

NAGAR SEVA. AB AUR AASAN.

Shahar ki seva, seedhi aapke phone par.

Digital Nagar Palika - nagrik services aur municipal operations ke liye ek secure, mobile-first platform foundation. Marathi, Hindi aur English ke liye tayyar; ward se district tak expand karne ke liye designed.

Har nagrik ko ek saaf raasta. Har adhikari ko ek accountable workflow.

Phone par complaint ya service request. Office mein triage, assignment, approval aur audit. Maqsad hai process ko simple banana - bina official decision ya citizen data par control kam kiye.

Nagrik ke liye

Complaint, status, notices, services aur verified contacts - ek easy mobile experience ke vision ke saath.

Municipal team ke liye

Ward-scoped work queues, approvals, records aur audit trail - role ke mutabik access.

Leadership ke liye

Ward aur department level par actionable aggregates; sensitive citizen records par least privilege.

MOBILE-FIRST

3 BHASHAON KA SUPPORT

WARD-SCOPED ACCESS

AUDIT-READY DESIGN

Platform foundation - features municipality configuration, integrations aur phased implementation ke saath activate honge.

Service ka safar - citizen se resolution tak

Ek complaint ko phone se field action aur citizen feedback tak trace karne ka clear workflow.

01 REPORT	Nagrik category, description aur location deta hai. QR se area choose hota hai - private household data nahi khulta.
02 TRIAGE	Authorized team complaint ko ward/department ke hisaab se dekhti aur zimmedar officer ko assign karti hai.
03 ACTION	Field officer work update, notes aur evidence record karta hai; har status change audit hota hai.
04 CLOSE THE LOOP	Nagrik update dekhta hai, outcome par feedback de sakta hai aur zarurat par issue reopen kar sakta hai.

Ek hi platform. Kaam ke hisaab se modules.

Citizen services Complaints, announcements, service catalogue, schemes, feedback aur notifications.	Municipal operations Household verification, ward dashboards, documents, field visits aur approvals.	Future-ready GIS layers, payment adapters, AI-assisted trends aur taluka/district aggregates.
AI madad kare - faisla adhikari ka	AI complaint sort, trends summarize aur approved knowledge se jawab draft kar sakta hai. Eligibility, rejection, approval ya legal decision authorized official hi karega.	

Trust pe bana platform. Ground reality ke saath rollout.

Government technology mein bharosa slogans se nahi - scoped access, approved content, tested recovery aur accountable operations se banta hai.

DATA KI HIFAZAT	Least-privilege roles, tenant/ward scope, masking, audit aur private document handling ke liye architecture.
OFFICIAL CONTROL	Emergency contacts, schemes aur notices verified source aur municipal approval ke baad hi publish hon.
RECOVERY READY	Encrypted backup, monitoring, incident process aur restore rehearsal ko deployment gate banayein.

Pilot se scale tak - measured steps

1. DISCOVER Processes, data policy, official sources, roles aur integrations map karein.	2. CONFIGURE Municipality branding, wards, services, languages aur approval flows set karein.	3. PILOT Synthetic data se security, access, usability, backup aur staff training validate karein.	4. EXPAND Authorized production gate ke baad modules aur phir taluka/district aggregates rollout karein.
--	---	--	--

Aapki Nagar Palika ka agla kadam?

Ek discovery workshop schedule karein. Pehle workflow aur data policy samjhein; phir scoped pilot, acceptance criteria aur deployment plan tayyar karein.

Imandaar vaada: koi software 0 failure guarantee nahi kar sakta. Humara focus hai failure ko detect, contain, recover aur learn karne layak system banana.

Note: yeh platform foundation aur proposed delivery vision ka brochure hai. Login, live municipal integrations, production workflows aur provider configuration rollout scope mein implement aur verify hone baaki hain.
