

Aapki har clinic. Ek smart platform.

Aaj 3 clinics se shuru. Kal jitni clinics aap grow karein - sabka control ek jagah.

Clinic chalana easy ho. Growth par focus zyada ho.

Appointments, patients, treatment, payments, stock aur team coordination - alag registers aur scattered messages se nikaal kar ek connected workflow mein. Owner ko poori picture. Team ko apna kaam. Patient ko clear next step.

MULTI-CLINIC	PATIENT-FIRST	MOBILE + WEB	AI-ASSISTED
--------------	---------------	--------------	-------------

Sirf ek clinic ke liye nahi - aapke poore growing network ke liye.

Clinic-wise data, team aur operations ko manage karein; authorized owner view se clinics ko individually ya saath mein dekhein. Nayi location add karne ke liye platform ko scalable, tenant-aware architecture ke saath plan kiya gaya hai. Clinic count aapke business ke saath badh sakta hai, deployment capacity aur plan ke hisaab se.

Clinic ke har din ke liye - ek connected toolkit

Reception se treatment room tak, aur inventory se accounts tak: team ko wahi tools milen jo unke role aur clinic ke liye zaroori hain.

Appointments & front desk

Doctor availability, clinic hours/holidays, day/week/month calendar, booking, walk-ins, recurring visits, check-in, reschedule, cancellation aur no-show tracking.

Patient records & onboarding

Searchable patient profile, medical/dental history, allergies, medications, documents, X-rays, communication history aur secure onboarding link with OTP/authentication.

Clinical workspace

Treatment plans, clinical notes, history, interactive tooth chart, prescriptions, consent forms, digital signature aur secure patient document access.

Payments & finance

Invoices, receipts, cash/UPI/card/bank entries, gateway-ready payments, pending balance, refunds, expenses, daily close aur clinic-wise financial reports.

Inventory & suppliers

Barcode scan, stock in/out, batches, expiry, low-stock alerts, purchase orders, suppliers, stock adjustment aur clinic-to-clinic transfer.

Patient portal & chat

Patient appointments, booking request, treatment status, prescriptions, invoices, payment history, secure chat, document upload aur follow-up request.

Owner dashboard & reports

Revenue, expenses, profit, appointments, new/returning patients, outstanding payments, clinic comparison, doctor workload aur PDF/CSV/Excel reports.

Team, access & audit

Clinic-wise team memberships, granular permissions, activity history, sensitive-action audit trail aur role-based owner, doctor, reception, accountant, inventory aur staff views.

Har screen role ke hisaab se. Har clinic ka data authorized access ke andar.

Web dashboard owner, admin, doctor, receptionist aur accounts team ke liye. Android app on-the-go workflows ke liye. Patient portal se patients apni information aur clinic ke saath interactions access kar sakte hain.

Routine kaam smart. Faisle aapke.

AI aur voice ka use admin kaam ko tez karne ke liye - dentist ki clinical judgment ko replace karne ke liye nahi.

AI ASSISTANT	VOICE ASSISTANT
Owner pooch sakta hai: iss mahine kis clinic ki revenue kitni rahi? Kaunsa stock expire hone wala hai? Is week kisko follow-up chahiye? AI authorized data se summary ya message draft banane mein madad kare.	Boliye: aaj ke appointments dikhao, Rahul ke liye follow-up draft karo, ya Clinic 2 mein stock check karo. System intent samjhe, access/availability validate kare, zaroorat par confirmation le, phir action kare.

Aur roz ke kaam jo apne aap yaad rahein

- 24-hour aur 2-hour appointment reminders, post-visit message aur due follow-up nudges.
- Low-stock aur expiry alerts; birthday, preventive-care, review requests aur targeted offers - patient consent/preferences ke saath.
- Push, WhatsApp Business provider, SMS aur email ke liye configurable integrations; delivery logs aur retry.
- Offline-friendly mobile experience: recent records dekhna aur drafts queue karna; sensitive changes server par validate hote hain.

Aapke clinic data ke liye care

Clinic-level permissions, secure patient access, audit history, encrypted transport aur private file access architecture ke core requirements hain. AI actions scoped tools se chalne chahiye; sensitive update se pehle confirmation aur permission check zaroori hai.

Apni clinic growth ko next level par le jaiye.

DentalCare / ClinicOS ka guided walkthrough book karein - aur dekhein ki aapke clinics, team aur patient workflows ko ek platform kaise jod sakta hai.

DentalCare / ClinicOS | Naam aapke brand ke hisaab se configurable

Rollout note: Yeh brochure product vision aur planned capabilities batata hai. Current codebase Phase 1 foundation hai; har feature clinic rollout se pehle implementation, integration, testing, configuration aur operational validation maangta hai. Platform clinical diagnosis ya dentist ke professional judgment ka substitute nahi hai. Privacy aur regulatory requirements jurisdiction ke hisaab se verify karein.
